

moon garden

Neil Thornock

moon garden

Program Note

At the time of composing this work, I spent my summer nurturing three Missouri evening primroses. The large, beautiful flowers bloom in the evening and throughout the night, then fade in the heat of day. The nocturnal flowers attract other night-loving life. *moon garden* particularly evokes an evening in the middle of June, when my visit to the flowers at about ten p.m. was accompanied by two moths in amorous, ground-level flight – a microcosm of rapture. *moon garden* was written for The tbd.

Performance Notes

Indications for vibrato and nonvibrato last until the next indication. The vibrato should be somewhat wide, warm, and slow. Rhythms should be flexible throughout. The tremolos beginning in m. 116 are unmeasured.
