

Oboism

solo oboe

Neil Thornock

Program note

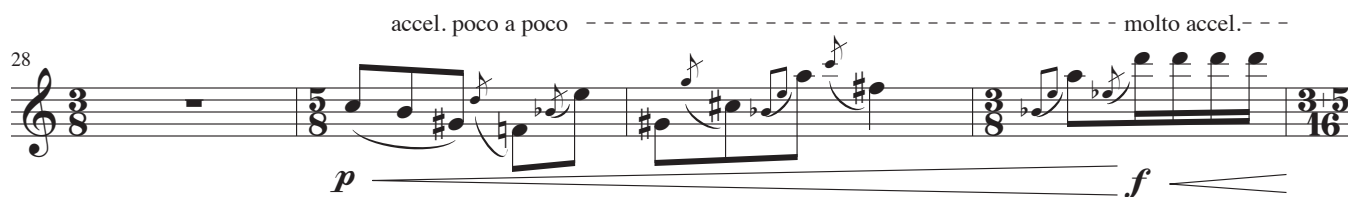

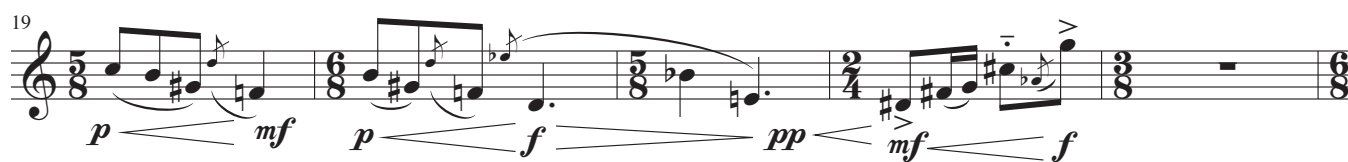

This brief abstraction strives to embody those qualities of the oboe which I find particularly characteristic: it is at once plaintive and playful. Rather than contrasting these characteristics through juxtaposition, as with previous (and subsequent) pieces, I “grew” a single idea from one characteristic to the other. The plaintive, simple three-note motive at the beginning is treated to a series of transformations which culminate in the playful, if not vigorous, climactic section.

Duration: ca. 4 min.
